SUMMARY

Founder-minded Staff UX Designer with 6+ years building enterprise platforms, design systems, and AI-powered workflows.

I operate at the intersection of: - Enterprise UX Strategy - AI-Augmented Product Development - Design Systems Architecture - Product Discovery & Delivery - Founder-Led Execution

Known for transforming complex business challenges into scalable platforms while leveraging AI-assisted workflows to dramatically accelerate research, prototyping, and delivery velocity.

EDUCATION

East West College of Management

MBA

2016

Seshadripuram Institute of Commerce & Management

BBM

2014

EXPERIENCE

Staff UX Designer

Concyrus

2023 – Present

London, UK (Remote)

Enterprise Insurance & Underwriting Platforms

- Architecture Leadership: Joined as the sole designer and helped scale product architecture supporting a growing UX team across Marine, Aviation, Cargo, and Construction platforms.
- AI-Powered Transformation: Designed AI-assisted submission ingestion workflows that scaled horizontally across five business units with virtually no engineering rework.
- Design Systems: Established enterprise-wide design standards, governance frameworks, and reusable component systems.
- Product Operations: Introduced recurring Design Panorama reviews and sprint governance practices that accelerated product decision-making and delivery.

UX Designer

CoreValue Technologies

2020 – 2023

- Product Discovery: Shifted teams from feature-driven execution toward user-centered discovery practices.
- Operational Efficiency: Reduced discovery overhead by approximately 25% through structured research frameworks.
- Design Excellence: Implemented Figma governance and prototyping standards that improved delivery speed by 20%.

UI Designer

LocalCube Commerce / StoreKing

2019 – 2020

- Inclusive Product Design: Designed low-bandwidth, low-cognitive-load mobile experiences for rural commerce ecosystems.
- Accessibility & Adoption: Focused on usability for first-time digital users operating in low-connectivity environments.

PROJECTS

Spendly | Solo Founder & Product Builder; Live AI-Assisted SaaS Product

- Independently conceptualized, designed, and launched a behavioral expense-tracking application.
- Built using Claude AI, Lovable, Supabase, and Vercel.
- Acquired and retained 25 highly engaged daily users without paid marketing.
- Demonstrates: Product Thinking • UX Strategy • AI-Augmented Development • Customer Validation • Execution

UX Research Audit Engine | AI Innovation Initiative

- Developed a custom AI-powered UX evaluation framework.
- Automated usability analysis across multiple interfaces simultaneously.
- Reduced traditional research timelines from weeks to hours.

BUSINESS VALUE DASHBOARD

92% Reduction — AI Submission Intake Platform: Reduced manual underwriting effort and enabled 2.5x submission throughput. 4x Increase — Underwriter Workbench Redesign: Accelerated decision-making and increased enterprise deal velocity. 0 Backend Dependency — Self-Serve Team & User Management: Eliminated engineering bottlenecks and became a flagship enterprise feature. Zero Redesign Required — Horizontal Product Architecture: Successfully

scaled across 5 multi-million-dollar Lines of Business. >50% Time Saved — AI Research & Audit Frameworks: Compressed weeks of UX analysis into automated multi-screen evaluations.

CREATIVE LEADERSHIP & ENTREPRENEURIAL VENTURES

Founder & Film Director — Suryavansh Creations: Lead writer, director, producer, and creative strategist for independent media productions. Manage creative teams, production planning, budgeting, and execution. KathaRatha (AI Storytelling Initiative): Founded and scaled an AI-powered storytelling brand focused on transforming ancient Indian scriptures into modern visual experiences. Designed end-to-end content pipelines using AI-assisted scripting, visual generation, and audience growth systems. Brand & Audience Development: Responsible for positioning, content strategy, distribution, and organic audience engagement.

CREATIVE FOUNDATIONS

Performing Arts — Kathak Performer: Classically trained storyteller with experience performing in major stage productions alongside renowned artists. Visual Arts: Traditional drawing, painting, and craft foundations that continue to influence modern digital product design and visual storytelling.

POSITIONING STATEMENT

STAFF UX DESIGNER × AI PRODUCT BUILDER × FOUNDER A rare combination of enterprise UX leadership, AI-augmented execution, and founder-level ownership capable of taking products from concept to production with minimal organizational overhead.
