

Founder-minded Staff UX Designer with 6+ years building enterprise platforms, AI-powered workflows, and scalable design systems. Known for transforming complex business challenges into high-impact digital products while leveraging AI to accelerate research, prototyping, and delivery.

BUSINESS IMPACT

92%

Effort Reduced

Manual underwriting cut via AI-powered submission intake workflows.

4x

Faster Decisions

Underwriting velocity gained through workbench workflow redesign.

50%+

Time Saved

AI UX-audit framework compressed research from weeks to hours.

5

Business Units

Architecture scaled across enterprise lines with zero redesign.

0

Backend Dependency

Self-serve enterprise features shipped without eng bottlenecks.

PROFESSIONAL EXPERIENCE

Staff UX Designer

2023 — Present

Concirrus · Enterprise Insurance & Underwriting Platforms

- Architecture leadership — joined as sole designer and scaled product architecture across Marine, Aviation, Cargo & Construction platforms, supporting a growing UX team.
- AI-powered transformation — designed AI-assisted submission-ingestion workflows that scaled horizontally across 5 business units with virtually no engineering rework.
- Design systems — established enterprise-wide standards, governance frameworks, and reusable component systems.
- Product operations — introduced recurring Design Panorama reviews and sprint governance that accelerated decision-making and delivery.

UX Designer

2020 — 2023

CoreValue Technologies

- Product discovery — shifted teams from feature-driven execution toward user-centered discovery practices.
- Operational efficiency — reduced discovery overhead by ~25% through structured research frameworks.
- Design excellence — implemented Figma governance and prototyping standards that improved delivery speed by 20%.

UI Designer

2019 — 2020

LocalCube Commerce · StoreKing

- Inclusive product design — designed low-bandwidth, low-cognitive-load mobile experiences for rural commerce ecosystems.
- Accessibility & adoption — focused on usability for first-time digital users in low-connectivity environments.

FEATURED PROJECTS

Spendly

LIVE SAAS

Solo Founder & Product Builder

- Independently conceptualized, designed & launched a behavioral expense-tracking app.
- Acquired and retained 25 highly engaged daily users with zero paid marketing.

Claude AI · Lovable · Supabase · Vercel

AI UX Research Audit Engine

AI INITIATIVE

Creator & Lead Architect

- Built a custom AI-powered UX-evaluation framework for usability analysis.
- Automated multi-screen reviews, cutting research timelines from weeks to hours.
