

PROFESSIONAL SUMMARY

Staff UX Designer with 7+ years in enterprise UX strategy, product discovery and design systems across B2B SaaS, InsurTech, IoT and e-commerce. At Concirrus, grew the design team from one to four and turned a Marine-only underwriting workflow into one platform used across four specialty insurance lines of business. Also designs and builds live products end to end, using AI tools to go from wireframe to a working app.

CORE COMPETENCIES

Strategy & Discovery: Product Strategy • Enterprise UX Strategy • Product Discovery • User Research • Usability Testing • Service Design • Information Architecture

Design & Systems: User Flows • Journey Mapping • Interaction Design • Rapid Prototyping • Responsive Design • Design Systems • Component Libraries

Delivery & Governance: Design Governance • DesignOps • Engineering Handoff • UX QA • Figma • FigJam • Miro • Dovetail • Maze • Stakeholder Management • Cross-Functional Collaboration

Leadership & Process: Agile • Scrum • Team Leadership • Mentoring • Roadmap Alignment • Client Engagement • AI-Augmented Design Workflows

PROFESSIONAL EXPERIENCE

Staff UX Designer | Concirrus

Jul 2023 to Sep 2026

- Grew the design function from one to four designers, setting up hiring, onboarding and mentoring, across four specialty insurance lines of business: Marine, Aviation, Construction and PV&T.
- Owned end-to-end product architecture, UX strategy, roadmap alignment and DesignOps, from discovery through engineering handoff, UX QA and release.
- Redesigned a Marine-only submission workflow into one shared submission-to-quote-to-bind journey used across all four lines. New lines were added through configuration, with no full redesigns.
- Contributed to platform results of 92% less manual submission effort (from about half a day to minutes) and 2.5× more submissions per underwriter per day, with no added headcount.
- Designed a self-serve User and Team Management module, shipped in three phases. Role and permission changes went from about a week to a few minutes.
- Introduced three interaction patterns that became platform standards, and led a design system re-platform that brought fragmented UI patterns and duplicate component libraries into one governed library.
- Launched "Design Panorama," a bi-weekly cross-product design review that cut revision cycles by 20% and freed 4 to 6 hours per designer per week for research and strategy.

UX Designer | CoreValue Technologies

Oct 2020 to Jun 2023

- Owned end-to-end product design across four live products (IoT, insurance, e-commerce and corporate web), from discovery and information architecture through interface design and post-release support.
- Led client-facing requirements gathering, product ideation workshops and usability testing for stakeholders across India, the United Kingdom and the United States.
- Built complete design systems for client products, covering visual foundations, typography, components, interaction patterns and engineering handoff standards.
- Partnered with engineering on implementation and led UX quality assurance before every client release.
- Mentored junior designers through task allocation, critique and project reviews, helping them take more ownership while keeping design quality high.

UI Designer | LocalCube Commerce Pvt Ltd (StoreKing)

May 2019 to Oct 2020

- Designed responsive interfaces for an e-commerce technology business, turning business requirements into usable, consistent experiences.
- Worked with cross-functional stakeholders on design delivery and ongoing product improvements.

Talent Acquisition Executive | TalentX0 (formerly CrewKarma)

May 2017 to May 2018

- Managed talent acquisition before moving into product and UX design.
- Completed intensive UX design training and freelance design projects (2018 to 2019) to move full-time into product design.
- Built stakeholder communication, client coordination and problem-solving skills that carried directly into UX work.

INDEPENDENT PROJECTS

Spendly | Personal Finance PWA, Solo Build

2026 | Live Product

- Designed, built and shipped a personal finance app end to end, with no engineering support.
- Owned the full product lifecycle solo: UX architecture, UI design, build and deployment.
- Live product with real users and a 72% retention rate.

NutBite Store Manager | Freelance Product Designer & Builder

2026 | Live Product

- Researched how a family-run cashew store worked, and designed around a storekeeper with very little tech experience.
- Wireframed every screen in FigJam, then built the full app with Claude Design on a fixed design system, and deployed it live independently.
- Covers catalogue, inventory, sales, dashboard, reports, stock alerts and printed billing. Now in daily use at the store.
- The owners brought two more of their own businesses for Phase 2.

EDUCATION

MBA | East West College of Management • 2016

BBM | Seshadripuram Institute of Commerce and Management • 2014

CERTIFICATIONS & CONTINUED LEARNING

Generative AI Mastermind, Outskill (2026) • UX Designer, Aspire Gate, Bengaluru (2019)
